

*The Owners of Church View Care Home were extremely disappointed with the most recent CQC report into the service.*

*We would like to reassure all residents and their families that we are investing significantly in the service, including in relation to staffing, training, auditing and activities for our residents.*

*The health and wellbeing of our residents is our priority and we are working with an external agency to ensure our care is person centred and activity focused.*

*We welcome input from all residents and their families around Church View – please get in touch about any issue*
